ACADEMIC PROJECTS

Intelli Search: Dual API Powered Search Platform (Group Minor Project)
An Intelligent Search Platform Which mimic ChatGPT, Gemini functionality with the help of Gemini API and also recommend YouTube Video related to query using YouTube API.
- ❖ Real time query retrieval using **Gemini API** and **YouTube API.**
- ❖ Recommend 5 video from YouTube with higher comment videos.
- ❖ User info and search details saved using **MongoDB.**
- ❖ Mainly use **React** for these projects.

My work: I worked on the frontend **(CSS)** and focused on researching new feature implementations. I handled authentication using **Auth0** and resolved issues with AI assistance. Additionally, I implemented **YouTube recommendations** based on comment priority and contributed to project documentation.

SKILLS
- ❖ Java
- ❖ Oops, Dsa, OS
- ❖ HTML, CSS, JavaScript
- ❖ Github, Git

PRACTICE PROJECT
- ❖ Portfolio Website (HTML, CSS)
- ❖ Landing Page (Html, CSS)

CODING PROFILE

- ❖ Solved 200+ Dsa Problem on **LEETCODE** on intermediate Dsa Topics.
- ❖ Solved overall 250+ problem including both GFG and LEETCODE platform.

CERTIFICATES

Certification on Web Development in Virtual Internship Program in CodSoft.   *Aug 24-Sep 24*
